

Mark A. Stansberry, Chairman of The GTD Group, is producing a film documentary along with Academy Award winner Gray Frederickson. The film is based on the book, *The GET*, (The Grand Energy Transition) written by Robert Hefner III.

Below is a column that Mark wrote for the 2010 November okpolitico.com

THE PAST, PRESENT AND FUTURE OF NATURAL GAS IN OKLAHOMA NATURAL GAS: HOW IMPORTANT IS IT TO OUR ENERGY FUTURE? PART II

My last month's column focused on the importance of fellow Oklahoman Robert Hefner III's contribution to our energy past, present, and future.

This month's column highlights Robert Hefner III's new book entitled "The GET" (Grand Energy Transition).

The book has already brought national and international attention.

Ted Turner purchased several hundred copies of Hefner's book and had them distributed to Congressmen and Fortune 500 executives. Turner states about the book, "if you care about the future you must read this book".

Donald J. Trump states, "As a successful businessman and international real estate developer, I know the economic and environmental importance of energy. Robert Hefner, with over fifty years of hands-on experience in the complex world of energy production, consumption, and politics has written a groundbreaking book that cuts through the confusion and shows us a clear, common sense path forward. His concept that The Grand Energy Transition is choosing the energy winners is critically important. "America does not have time for energy losers."

Having been in the natural gas industry for over thirty years, it is my strong opinion that this book is a must read. In fact, as I write this column, I am in Los Angeles and have seen first-hand how natural gas is making an impact. I have seen the nation's largest fleet of CNG buses running up and down the busy streets of Los Angeles.

Mark Stansberry hosting The Monthly Roundtable

THE MONTHLY ROUNDTABLE

Mark Stansberry hosts The Monthly Roundtable on the first Saturday of each month on KCFO AM970. Go to www.thegtgroup.com for past interviews. Upcoming guests for Feb. 5 at 1 pm, KCFO AM970, Tulsa, live feed- www.kcfo.com are: Fred Barnes, Executive Director of The Weekly Standard and Fox News contributor, formerly the Beltway Boys, Charlie Black, Senior Advisor to Presidents Reagan and Bush 41 and Senior Presidential Campaign Advisor to Senator John McCain, and Will Weatherford, Florida's next Speaker of the House.

*THE PAST PRESENT AND FUTURE OF NATURAL GAS IN OKLAHOMA NATURAL GAS:
HOW IMPORTANT IS IT TO OUR ENERGY FUTURE? CONTINUED*

The book has twelve chapters filled with significant information and overviews about natural gas.

Our nation definitely needs to shape its energy future. Hefner provides a roadmap of how natural gas will play such a vital role.

Hefner makes the convincing case that there is an abundance of natural gas, and that it is an environmentally friendly fuel. He emphasizes that "oil has indeed begun its twilight years" and that natural gas will be a force.

Therefore, Hefner delivers the message that our energy future will be the "Age of Energy Gases" which includes solar and wind.

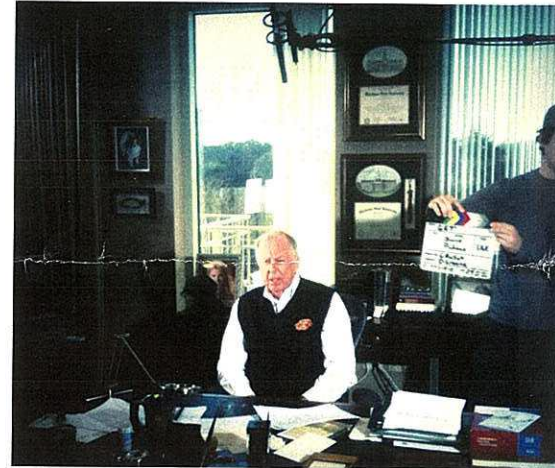

Hefner describes why natural gas will work. He provides historical data that supports natural gas. He points out that "America has houses, offices and industries that are already connected to America's 2.2 million mile natural gas pipeline. And that in America 63 million are on the grid, so about 130 million cars return each night to a place where they can easily be refilled".

He encourages consumers to look at all the opportunities that natural gas provides such as energy efficiency, economic impact, a transmission option and power generation solution.

Bottom-line, Hefner states that "natural gas is the bridge fuel to the hydrogen economy".

Again, I encourage you to purchase The GET. And Congratulations to Robert Hefner III for his induction into the Oklahoma Hall of Fame on November 4th. www.the-get.com

*Mark A. Stansberry is Chairman of The GTD Group, serves on several boards, author of the book "The Braking Point: America's Energy Dreams and Global Economic Realities" Founder and Chairman of the International Energy Policy Conference now its 19th year, President of the national organization, The Energy Advocates, 2003-2009, has testified before the U. S. Senate Energy and Natural Resources Committee. **He continues to lead the effort in purchasing oil and gas properties, minerals, & oil and gas leases, 1-877-715-1917.***
